**Pat Sparks
President
Diamond Fitness**

“The installation of Remote Deposit Capture by Independent Bank of Texas at my company has eliminated drive time and is worth more than I could have imagined.”

Mr. Pat Sparks—President of Diamond Fitness

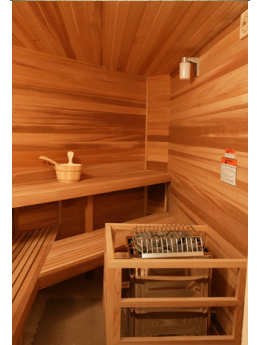

Diamond Fitness was founded in 1989 by Patrick Sparks. Since then, Diamond Fitness has generated sales with personal attention to installation and service for millions of dollars of fitness, sauna and specialty athletic flooring products throughout the continental United States. Their core customers are among the most recognizable health club chains, apartment developers and general contractors in the industry.

Customers return to Diamond Fitness because they have access to the high standards Pat has set for his associates and vendors who are crucial in creating and supporting an environment that ensures quality of life and long term profitability for all parties.

In 2007, Diamond Fitness made the decision to partner with Independent Bank of Texas for numerous reasons including remote deposit capture. “Remote deposit capture from Independent Bank of Texas allows me to efficiently handle my banking tasks. IBT is an exceptionally easy group to work with and they have helped me make the most of my time and resources relative to the banking process. Setup and use of remote deposit capture has been very easy. The technology IBT uses is cutting edge and loaded with great features. The IBT team provides great customer service and I’m very happy I made this amazingly simple transition to Independent Bank of Texas.”

“I am happy I made the decision to bank with IBT and won’t be going anywhere else but Independent Bank of Texas for all my banking needs.”

Pat Sparks—President of Diamond Fitness
