*“Remote Deposit Capture from Independent Bank of Texas provides us with the flexibility to make deposits 24/7 and for a small company where everyone wears many hats that’s very convenient.”*

Phil Lake, President—Knight Security Systems, LLC

---

Knight Security Systems is a full service, fully licensed commercial business and residential security and fire alarm company based in Dallas, Texas. The intrusion alarm systems, CCTV systems, access control systems, fire alarm systems and alarm monitoring services provide protection with peace of mind to Texas homes and businesses.

“Productivity is improved dramatically as now we spend a few minutes making a deposit instead of an hour traveling to the bank and back,” noted Phil Lake. “The solution for Remote Deposit Capture from Independent Bank of Texas is a great system. To any other company considering Remote Deposit Capture don’t hesitate. To any company interested in excellent personal and timely customer service look no further. We have had an exceptional experience so far at IBT from Brad Durham, President of Independent Bank of Texas, to the whole team, everyone works to accommodate the customer and that’s hard to find at the nationals.”

Knight Security Systems is owned and operated by Texans with world-class profiles in the residential and commercial security industries. Their depth of professional expertise, combined with the commitment and passion of the finest electronic security personnel in Texas creates a winning combination resulting in the right protection for you.
