

“Remote Deposit Capture has eliminated time consuming photocopying, filing, data entry and removed the cost and liability of regular trips to the bank to make deposits.”

Reza Khavari, President  
System Concepts, Inc.

System Concepts, Inc. is recognized throughout Texas as a “customer focused” organization. Clients include Fortune 500 companies, leading edge systems integrators and wireless technology providers. Based in Irving, Texas, System Concepts, Inc. specializes in managing intricate relationships between multiple vendors, while helping companies leverage e-business solutions to maximize return on investment.

“In 2003, System Concepts started working with Independent Bank of Texas, providing complete hardware & cabling solutions for the Irving and Frisco branches. Our company started using the Remote Deposit Capture service in early 2007 and it has proven to be a solid decision, voiced Reza Khavari, President of System Concepts, Inc. “Setup and training went extremely smooth. Follow-up and support have exceeded our expectations.”

Independent Bank of Texas Remote Deposit Capture is a check processing solution that allows business customers to make deposits electronically by utilizing a desktop scanner connected to their PC and the Internet. Once checks that are to be deposited are scanned, images of the checks are electronically transmitted for deposit directly to Independent Bank of Texas. This deposit solution dramatically reduces the amount of time spent preparing and delivering deposits and gives the business more time to spend on growing their business.
